

Ideation Phase

Define the Problem Statements

Date	19 November 2022
Team ID	PNT2022TMID03996
Project Name	Project - AI - Based localisation and classification of skin disease with Erythema
Maximum Marks	2 Marks

Customer Problem Statement Template:

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love.

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	Those who are concerned about any skin condition symptoms.	Create an open web application.	The Virtual Accuracy in a mobile device is inferior than a hospital test.	Data must be gathered from multiple platforms, and more precise algorithms must be used.	Most likely, Humans prefer to visit a hospital for a preliminary examination. They will go to the hospital at the very end, which is bad for their health.
PS-2	Those individuals receiving therapy for skin conditions must monitor their progress.	Does the patient ask themselves at random if our treatment makes a difference in their lives or not without visiting a hospital	The Result maybe not accurate as the Test result Provided by Doctors	The website will periodically provide an accurate result. But occasionally, the application could make a mistake.	A more appropriate and accurate algorithm must be chosen and employed in order to overcome the inaccuracy in the outcome. A more accurate result will always draw in the user (whether they are affected or not).
